Done

Instructions

In this assignment you will create a table and insert a few rows.

Host: pg.pg4e.com

Port: 5432

Database: pg4e_2165bd5291

User: pg4e_2165bd5291

Password: pg4e_p_4e15809518c8d6 (hide/show copy)

Check Answer

Here is the the **psql** command to access your database:

```
psql -h pg.pg4e.com -p 5432 -U pg4e_2165bd5291 pg4e_2165bd5291
```

Create this table:

```
CREATE TABLE ages (
  name VARCHAR(128),
  age INTEGER
);
```

Make sure the table is empty by deleting any rows that you previously inserted, then insert these rows (and only these rows) with the following commands:

```
DELETE FROM ages;
INSERT INTO ages (name, age) VALUES ('Ajay', 33);
INSERT INTO ages (name, age) VALUES ('Ayla', 40);
INSERT INTO ages (name, age) VALUES ('Johnjay', 38);
INSERT INTO ages (name, age) VALUES ('Luqman', 17);
INSERT INTO ages (name, age) VALUES ('Meadow', 14);
INSERT INTO ages (name, age) VALUES ('Riva', 17);
```

Once the inserts are done, check your answer.
