Done

Using ALTER TABLE

In this exercise you will add a column to your **pg4e_debug** table. The column can be any type you like - like INTEGER. **neon651**.

The auto grader will run the folowing command:

```
SELECT neon651 FROM pg4e_debug LIMIT 1;
```

The auto grader does not need to get any data - the above SQL simply needs to not fail due to a syntax error (i.e. the column must exist).

Host: pg.pg4e.com

Port: 5432

Database: pg4e_3774c65c52

User: pg4e_3774c65c52

Password: (hide/show copy)

Check Answer

Here is the the **psql** command to access your database:

```
psql -h pg.pg4e.com -p 5432 -U pg4e_3774c65c52 pg4e_3774c65c52
```
